

Innovative

STRATEGY

Community investments made through Helios' Innovative area provide the Foundation the flexibility to support initiatives that address key education reform issues. Like the Foundation's other focus areas (Early Grade Success, College and Career Readiness and Postsecondary Completion), innovative investments support the Foundation's broader strategic effort to build and reform effective and coordinated education systems in both states that prepare all students for success in college and career.

Celebrating 10 Years of Impact in Innovative Partnerships

Through the Innovative Partnerships impact area, Helios has invested nearly \$20 million in partnerships that are improving educational outcomes for all students in Arizona and Florida. Through this work, the Foundation is helping make education a higher priority, fostering collaboration and engaging in robust dialogue around the most important issues in education.
